PRODUCT OVERVIEW:

The field adjustable Model 470 WECO® Hammer Union Pressure Transmitter from GP:50 is ruggedly designed and engineered to effectively address demanding shock and vibration and installation challenges within the oilfield environment. Units are directly compatible with WECO® 2"-1502, 2202, 2002 or 602 wing union fittings. The field adjustment option provides for zero and span adjustments as well as rangeability. This field adjustable option eliminates the need to rescale your panel meter when replacing transmitters and allows for fewer pressure ranges to stock.

FEATURES:

- Reduced zero offset due to installation
- High-accuracy option of $\pm 0.10\%$ FSO
- Corrosion resistant, high strength fasteners eliminate housing breakage
- Field rangeable electronics via HART communicator or HART USB Dongle and GP:50 software
- 0 to 1000 thru 0 to 20K PSI (69 thru 1,379 BAR)
- Compatible with 2" 1502, 2002, 2202, and 602 wing union fittings

APPLICATIONS:

- Fracking, cementing, coil tubing and acidizing
